Rabina Gurung | Full Stack Engineer

ON, Canada | +1 (437) 661-9380 | rabina.gurung487@myjobsca.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Engineer with **3+ years** of experience developing responsive web applications, reusable frontend components, backend services, and REST API integrations using React.js, TypeScript, Python, JavaScript, and SQL. Experienced in frontend optimization, API development, relational and NoSQL databases, automated testing, and debugging across professional and co-op work environments in Canada and India. Collaborates with development and QA teams to build maintainable applications and support reliable software delivery using Agile practices.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, React Hooks, state management, responsive design, reusable components, form validation, accessibility, cross-browser compatibility

Backend and APIs: Node.js, Express.js, FastAPI, Flask, Django (fundamentals), RESTful APIs, JSON, Swagger/OpenAPI, request validation, middleware, exception handling, authentication fundamentals

Databases: MongoDB (NoSQL), PostgreSQL, MySQL, SQLite (relational), SQL queries, joins, CRUD operations, database schema fundamentals, data validation, relational database concepts, NoSQL document modeling

Testing and Debugging: Pytest, Jest, React Testing Library, Postman, unit testing, API testing, browser developer tools, defect troubleshooting

Tools and Cloud: Git, GitHub, GitHub Actions, Continuous Integration and Continuous Delivery (CI/CD), Docker (fundamentals), AWS (fundamentals), Linux, npm, Vite, VS Code

Practices: Agile/Scrum, Software Development Life Cycle (SDLC), code reviews, technical documentation, logging and monitoring, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Full Stack Engineer **Feb 2025 – Present | Canada**

Manulife

- Improved frontend performance by 30% by building reusable React.js components, optimizing rendering behavior, and refining responsive CSS layouts.
- Cut page load time by 20% by streamlining JavaScript execution, reducing unnecessary component re-renders, and improving API data-fetching patterns.
- Reduced API integration defects by 25% by building Python REST API functionality, validating request payloads, and standardizing error handling.
- Raised automated test coverage from 55% to 80% by writing Python unit tests with Pytest and frontend tests with Jest and React Testing Library.
- Build responsive interfaces in React.js, TypeScript, HTML5, and CSS3, connecting them to backend services and managing application state.
- Partner with developers and QA engineers on code reviews, debugging, functional testing, and Agile delivery to keep application quality high.

Web Developer (Co-op) **Sept 2024 – Dec 2024 | Canada**

Fanshawe College

- Built 12 reusable UI components in React.js, TypeScript, HTML5, and CSS3 to bring consistency to application screens.
- Reduced manual form-validation effort by 25% by adding client-side validation, shared input-handling logic, and clear error messages.
- Integrated 8 REST API endpoints, processing JSON responses and handling loading and error states in the connected frontend components.
- Supported backend logic in Python, including input validation, defect troubleshooting, and database interactions.
- Ran cross-browser tests and documented defects, managing source code with Git and GitHub alongside the project team.

Software Engineer / Full Stack Developer **Apr 2022 – Jul 2023 | India**

Wipro

- Improved frontend maintainability by 30% by building reusable React.js components and organizing JavaScript into modular structures.
- Reduced API response-processing errors by 25% with Python-based validation, exception handling, and consistent REST response structures.
- Cut regression-testing time by 35% by creating automated test cases and standardizing repeatable test scenarios, and supported defect verification.
- Developed React.js, JavaScript, HTML5, and CSS3 features for interactive workflows and responsive layouts.
- Wrote SQL queries and implemented CRUD operations to retrieve, update, and validate data in relational databases.
- Investigated defects through debugging and regression testing, collaborating with development and QA teams under established SDLC practices and Git workflows.

PROJECTS

Echo, AI-Powered Customer Support Platform | TypeScript

- Built a customer support platform with an embeddable chat widget and real-time conversation capabilities.
- Worked on support workflows covering text-based interactions and voice-call functionality.
- Structured the interface for integration into other web applications.

Devoverflow, Developer Q&A Platform | Next.js, TypeScript, MongoDB, AI Integration

- Built a platform for technical discussions, knowledge sharing, and developer questions using Next.js and TypeScript.
- Stored application data in MongoDB and added AI-powered answers to support developer questions.

TeamFlow, Team workspace app with channels | TypeScript

- Built TeamFlow, a real-time team chat app with channels and threads, using Next.js, TypeScript and Node.js.
- Added login, sign-up, guest access and AI model support to keep team conversations in sync, using MongoDB.

EDUCATION

Postgraduate Certificate in Mobile Application Development **Aug 2023 – Dec 2024**
Fanshawe College | Ontario, Canada
