Summary

Front-end-leaning full-stack developer with 2+ years in React, Next.js, TypeScript, and Node.js. Builds content platforms and customer-facing web applications for automotive brands across the Middle East, with a focus on fast pages and CDN-backed delivery.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks: React, Next.js (App Router, Server Components), Node.js, React Native, Tailwind CSS

Data & APIs: PostgreSQL, Prisma ORM, MongoDB, Mongoose, Supabase, Convex, Firebase, REST, GraphQL

Cloud & Tooling: AWS (S3, CloudFront CDN), Vercel, Git, CI/CD, Docker, Jest, Agile/Scrum

Experience

Front-End Developer, Alternative Agency

Jan 2026 – Present

Dubai, United Arab Emirates

Next.js, TypeScript, Tailwind CSS, Firebase, AWS S3, CloudFront

- Built a custom CMS for the official Nissan Middle East and Ford ME Dealer platforms, letting regional marketing teams publish content themselves instead of routing every change through developers.
- Shipped vehicle product sites for Nissan Dubai, including Patrol Nismo, Kicks, Magnite, and Z Nismo, tuning load times and Core Web Vitals in every market.
- Migrated legacy JavaScript codebases to TypeScript, introducing shared types and reusable components that reduced runtime errors and improved maintainability.
- Developed internal admin interfaces for client and staff record management, used by the agency team day to day.
- Partnered with back-end and DevOps engineers to speed up asset delivery through an AWS S3 and CloudFront CDN architecture.

Web Developer (Co-op), Fanshawe College

Sep 2024 – Dec 2025

London, Ontario, Canada

React, TypeScript, Node.js, REST APIs

- Built and maintained internal web applications used by students and staff, owning features end to end from requirements gathering through deployment.
- Refactored legacy front-end code into reusable, typed React components, streamlining rendering paths and optimizing assets to improve page load performance.
- Improved accessibility across the applications by correcting semantic markup to WCAG guidelines.

Projects

Echo — Next.js, TypeScript, Convex, Clerk, OpenAI SDK

Source / Demo

- Developed an AI-powered SaaS support platform that resolves customer queries automatically and escalates to human agents when confidence is low, delivered as an embeddable widget for client sites.
- Implemented multi-tenant support so each client organization keeps isolated conversations, branding, and knowledge base, embeddable via a single script tag.

TeamFlow — Next.js, TypeScript, ORPC, Prisma, PostgreSQL, BetterAuth, Polar, OpenAI SDK

Source / Demo

- Built a team workspace supporting channels, direct messages, and threaded conversations, with an integrated AI assistant for Q&A, thread summarization, and message refinement.
- Implemented the full authentication surface with BetterAuth: login, email invitations, verification, and password reset.

Dev Overflow — Next.js, TypeScript, Mongoose, MongoDB, OpenAI SDK

Source / Demo

- Built a developer Q&A community with question posting, answer voting, content discovery, and AI-assisted answer suggestions.

Education

Fanshawe College

Postgraduate Certificate, Mobile Application Development

Aug 2023 – Dec 2024

London, Ontario, Canada

London Metropolitan University

Bachelor of Science, Information Technology

2019 – 2022

London, United Kingdom
